sdmay18-14: Mobile and Web Timecard
Week 10 Report
December 2 - December 8

Team Members

Christian Wesseler — *Lead Designer/Documentation Keeper*
Nicholas Flege — *Lead iOS Programmer*
Andrew Hoelscher — *Lead Tester*
Connor McCann — *Lead Android Programmer*
Cole Stephan — *Lead Server Programmer*
Jason Thomas — *Administrative Lead*
Thomas Reins — *Lead Web Programmer*

Summary of Progress this Report

During this week we had our presentation to the faculty panel, so a lot of our efforts were spent on finishing up the documentation and putting together the slides along with practicing the presentation. We met with Tom from Genova to go over the plan for the rest of the semester and what we should plan on over break.

Pending Issues

No pending issues.

Plans for Upcoming Reporting Period

As discussed in our meeting with Tom we need to set up separate end points for communicating with the server and getting data from the database. Christmas break is coming so we will be working on the project when we have time over break and also hopefully meet with Genova a couple times.

Individual Contributions

Team Member	Contribution	Weekly Hours	Total Hours
Christian Wesseler	Met with team, rehearsed presentation, presented to panel, and continued revising design document.	4	51
Nicholas Flege	Setup database on Azure based on our database design in preparation for dummy data to be added to database. Started creating endpoint for uploading csv file so dummy data can be input into database instead of adding each entry by hand. Started to setup iOS timecard app by creating Xcode project and uploading to git repo.	6	71
Andrew Hoelscher	Worked on documentation a bit before the presentation. Met with the group to rehearse, and then gave our final presentation to the panel. I will be spending more time working on the final version of our documents after this update.	6	51
Connor McCann	Met with team to finalize documentation work, met	7	52

	with our Genova advisor (Tom Sidebottom), gave our final presentation, and begun creating Android studio app co communicate and pull data from the database		
Cole Stephan	Worked on presentaion individually and with the team. Also worked on documentation.	5	48
Jason Thomas	Met with team to finalize documentation work, met with our Genova advisor (Tom Sidebottom), practiced and gave the presentation to the panel of faculty. Need to work on setting up a web app endpoint with Tommy	6	62
Thomas Reins	Worked on presentation. Finalized the semester with Tom. Spent some time on Azure working on database design. Began working on entity relationship diagram.	5	62
